

Open Air Collection

Open Air 401 - 423

Interface®

Open Air Collection

Smart design. Unlimited opportunities.

Open Air is an expansive platform of affordable, hard-working carpet styles designed with open spaces in mind. Available in our best-selling neutrals including classic cools and warmer hues, Open Air products integrate effortlessly with the Interface system of solutions to elevate any space. The biggest advantage of this in-demand collection? Innovation in both design and manufacturing allows us to create the same high-quality, high-performance carpet products you expect at one low price point.

No stranger to innovation, Interface produces carpet tiles with the lowest carbon footprint in the commercial flooring industry—before any offsets. And like all Interface products, the Open Air offering is third-party verified carbon neutral across the full product life cycle through our Carbon Neutral Floors™ program.

Installation Methods

PRODUCT OPEN AIR 423 COLOURS IRON & FLANNEL INSTALLED NON DIRECTIONAL

Why Our Modular Flooring?

Modular Flooring

Performance and flexibility. Interface's standard backing systems set the industry standard for modular performance. Tiles stay on the floor with no upcurl, no tapping and no rippling effect, yet are easy to selectively replace. Our modular carpet is easier to handle than bulky roll carpet and produces an average of just 2-5% waste compared to roll carpet's average of 15%. And it installs seamlessly with our LVT, no transition strips needed.

Carbon Neutral Floors™

Create a climate fit for life. All Interface flooring sold globally is third party verified carbon neutral across the entire product lifecycle. We've taken a holistic approach to achieve carbon neutrality, first through reducing the carbon footprint of our products and then using carbon offsets for the remainder, including the emissions from raw materials, our manufacturing processes and product use to end of life.

TacTiles®

No glue installation. Our revolutionary TacTiles installation system eliminates the need for glue, adhering tiles securely together to form a floor that "floats" for greater flexibility, easier replacement and long-term performance. The result? Less mess, less waste and virtually no VOCs, not to mention an environmental footprint that is over 90% lower than that of traditional glue adhesives.

Intersept®

Mold protection. Our proprietary preservative, Intersept, protects our modular carpet against mould growth and odour-causing bacteria—guaranteed. Intersept treated carpet, with proper maintenance, shows no mould or bacterial growth when tested as per the ASTM E2471 Standard Test Method. Intersept is EPA-approved for safe use in carpet, water insoluble and contains no halogens, heavy metals, phenols or formaldehyde.

Protekt®

Stain protection. The life and performance of your flooring is extended with Protekt, our patented stain resistant coating. Protekt uses advanced technology to provide a lasting barrier against permanent soiling and staining, which simplifies the cleaning process and enhances the longevity of your carpet.

ReEntry

At Interface, an *end of life solution* of our products is a reality. ReEntry is our innovative programme to reclaim materials used in our product. Taking back our product at end of life is a service we provide our customers to ensure that none of the products they use will end up in landfill. Whether it is recycling into new product or re-purposing, we see our customer's waste as an opportunity for new product life.

Health Product Declaration (HPD) –

A transparency tool for evaluating whether a product supports Green Chemistry. As part of our work on Health and Materials, Interface continuously reduces the environmental and health impacts of our products through elimination of materials of concern.

15-Year Warranty

Interface products are warranted for 15 years against excessive surface wear, edge ravel, backing separation, shrinking, stretching and static electricity even under castor chair conditions.

Local Manufacturing

We combine local responsiveness with a global experience. Being part of the same communities as our customers, we foster collaborative, committed, and productive relationships. Our carpet tiles are manufactured in Australia and China, contributing to local economies and the environment.

Third Party Certifications

Environmental Product Declaration (EPD)

The Environmental Product Declaration (EPD) is a third party verified environmental certification classified as Type III that quantifies and verifies the lifecycle impacts of products and goods according to the International Standards Organization (ISO) 14025, 14040, 14044 and EN 15804. EPDs help customers that are environmentally driven to evaluate the performance of a product and to make the best decision when choosing a product. All Interface products have EPDs.

Global GreenTag GreenRate - Level A

Global GreenTag's GreenRate certification is a product rating system recognised by the Green Building Council of Australia, New Zealand and South Africa. It has been set up to meet the criteria of the Green Star® "Sustainable Products" credits. All Interface products are certified "Level A".

Environmental Certification Scheme - Level 4

ECS-certified carpet manufacturers must adhere to a code of practice that details performance standards for raw materials, manufacturing, in-service use and end-of-life treatment. Interface flooring holds the highest grading under ECS.

NSF Certification

NSF International develops public health standards and certification programs that help protect the world's food, water, consumer products and environment. Interface carpet tile products are certified "Gold".

CRI Green Label Plus

The Carpet and Rug Institute (CRI) Green Label Plus sets higher standards for indoor air quality and ensures that customers are purchasing the very lowest emitting products on the market. Interface Carpet Tiles and TacTiles have fulfilled the requirements for this certification.

Singapore Green Building Product (SGBP)

The SGBP certification is designed to evaluate and certify building products that meet specific sustainability and environmental performance criteria. The certification scheme helps building professionals identify products that are sustainable and more carbon efficient. Interface carpet tile products are certified "Leader" and LVT products are at "Excellent" Level.

Best Practice Guidelines for PVC

A comprehensive standard for better PVC developed by the Green Building Council of Australia under its Green Star programme. Interface holds Lloyd's Statement of Compliance (Green Building Council of Australia Best Practice Guidelines 2013) for Best Practice PVC for all products made in Australia.

Our EPDs and certifications contribute credits towards Green Building Council's Green Star® rating system.

Green Star credits are approved by the Green Building Councils of Australia and New Zealand. The internationally-recognised Green Star rating system provides independent verification that a building or community project is sustainable. Developed by the Green Building Council of Australia, Green Star is Australia's only national, voluntary, sustainability rating system for buildings and communities.
