

A microscopic view of ice crystals, showing a dense network of thin, needle-like structures. The crystals are oriented in various directions, creating a complex, interlocking pattern. The background is a dark, textured blue, suggesting a liquid or semi-liquid state of water. The overall appearance is that of a highly ordered, crystalline structure.

Ice Breaker™

If you were a popsicle, what flavour would you be?

That's one way to warm up a room, but our favourite Ice Breaker is on the floor. Like any lead-in, it's a little provocative and ultimately puts everyone at ease. That is the magical combination—the excitement of the unpredictable with the reliability of the familiar.

Etched and angular, the subtle, seemingly random lines of Ice Breaker reflect the cracking and crazing of frozen water creating an organic geometry that moves fluidly and seamlessly across the floor in a non directional or monolithic installation.

In colours as warm or cool as your space demands, deep dive into all nuances of grey or natural, or dial up the fun with pops of colour ...all working together to create flooring that wont go unnoticed.
